

UPCOMING RELEASE

Even before the tragic attacks of September 11, 2001, Islam, the Prophet Mohammed (saaw), and committed Muslims in every corner of the world were already under attack. September 11th legitimized and deepened the Islamophobia that had already reared its ugly head. In one recently published book by an American author, the writer opined: "Sadly, much of anti-Western terrorism is simply Islam in practice, the text of the Qur'an in action."

***Islam & Terrorism: Myth vs. Reality** is a fact based response to this type of warped thinking. Mauri' Saalakhani lays out the facts and then challenges the reader to discover the truth!*
